USB webkeys

What is a USB network key?

USB Webkey is a great way to get people to remember your logo without having to remember a long URL. Plug the Webkey into a USB port and your pre-programmed website launches automatically. USB Web Key is a low-cost alternative to USB flash memory devices and an effective way to promote your company, new product launch, training materials or recruitment events. It is available in a variety of shapes. The USB web key is preprogrammed using the URL you provide.

Description:

- USB2.0 standard, compliant with USB3.1,USB1.1.
- Auto run url when plug to USB of PC.
- Work in winodws98~win10, MAC OS 10.4.5 or newer versions.
- Up to 15 5 pieces characters for one url.
- Unique url , serials urls or random urls are optionals.

Paper webkey types:

- Layering paper webkey.
- Insert paper webkey.
- Push out paper webkey.
- Clip on paper webkey.

Layering paper webkey.

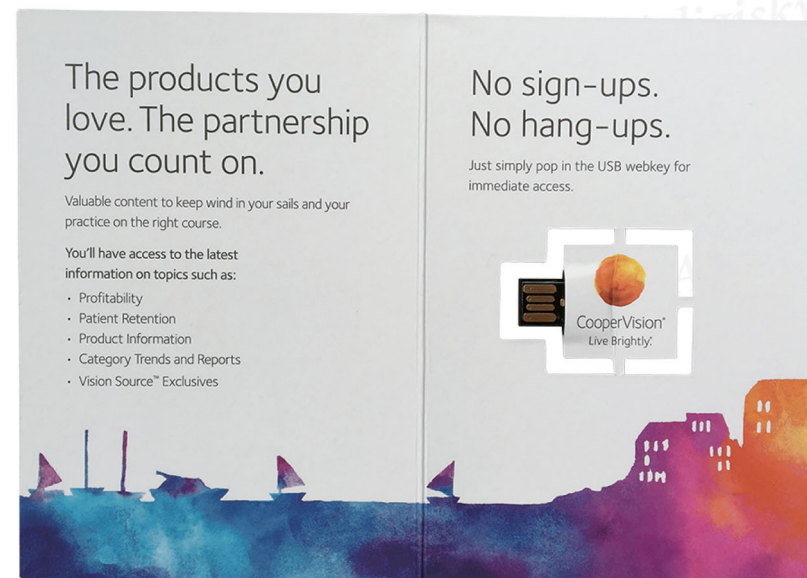

Use short webkey chips in plastic, and assemble to 350gsm coated paper. This model can be made as webkeys or USB drives include small capacity of 8MB and 16MB . It's suitable for paper USB drives also which the capacity above 2GB.

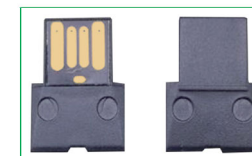

- Capacity from 16MB (Paper USB flash drive: 2GB~128GB).
- 350gsm coated paper. Matt or glossy lamination optional.
- Double sides CMYK offset printing.
- Preload files and lock are optional.

Insert paper webkey.

Use our standard webkey chips in plastic, and insert to double 300gsm (or double 250gsm paper if the flat paper size bigger than A5) coated paper. This model was popular in the past several years.

USB chip:

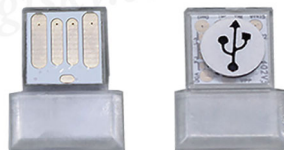

- Capacity from 16MB (Paper USB flash drive: 2GB~128GB).
- Double 300gsm (or double 250gsm if the paper flat size bigger than A5 size) coated paper.
